Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-10 (Cancelled)

*B1*  
11. (Currently Amended) A method for validating an address ~~entered by a user at a remote terminal for printing on a value bearing item (VBI)~~, comprising:

storing a plurality of pre-approved addresses in a database;

receiving the address from a source user at the remote a terminal remote from the database;

accessing a the database on an address matching server that contains one or more valid addresses;

comparing the address from the user with the database of valid pre-approved addresses for validating the address;

printing a validated address on the VBI; and

storing information relating to the validated address in a companion file on the remote terminal if a match is found upon a validation of the address.

12. (Original) The method of claim 11, wherein receiving the address comprises importing the address from a database of addresses.

**Reply to Office action of December 23, 2003**

B1  
13. (Original) The method of claim 12, wherein the address from the database of addresses is saved as comma-separated value (CSV) data, and further including:

determining selected characteristics of the database of addresses; and

processing the CSV address data based on the characteristics of the database of addresses.

14. (Original) The method of claim 11, further including:

receiving a second address from the source;

comparing selected information from the second address with stored information in the companion file;

approving the address for use if the selected information corresponds with the stored information in the companion file; and

accessing the database of valid addresses if no match is found.

15. (Original) The method of claim 14, wherein comparing the second address with the stored addresses in the companion file comprises determining whether a stored address in the companion file is stale, and rejecting the stored address if it is stale.

16. (Original) The method of claim 11, wherein accessing the database comprises accessing a remote database over a communication network.

B1  
17. (Original) The method of claim 16, wherein the database is maintained by a remote address matching server.

18. (Currently Amended) A method for matching an address with a database of valid pre-approved addresses for printing on a value bearing item (VBI), comprising:

storing a plurality of pre-approved addresses in the database;

receiving address data formatted in accordance with a particular format from a plurality of possible formats;

manipulating mapping the received address data with the particular format into a predetermined format ~~corresponding to said particular format~~;

comparing the address data in the predetermined format with valid pre-approved addresses in the database for validating the address; and

presenting the results if one or more matches are found; and

printing the address on the VBI.

19. (Original) The method of claim 18, wherein comparing data in the predetermined format with valid addresses in the database comprises accessing a remote database of addresses over a communication network.

20. (Original) The method of claim 19 wherein the database is maintained by a remote address matching server.
